Serial No. 10/761.387

Listing of Claims

The following is a listing of all the claims.

(Previously presented) A method for releasing fluid medicaments into a vessel wall of a
patient at a treatment site, the method comprising the steps of:

providing an expanding member defining an axis and having a plurality of dispensers mounted on said expanding member for movement therewith, said dispensers consisting only of dispensers positioned in a single plane oriented substantially perpendicular to said axis;

advancing said expanding member through the vessel to the site;

moving said expanding member between a first configuration wherein said dispensers are positioned substantially adjacent said axis of said expanding member, and a second configuration wherein said dispensers are radially extended from said axis for penetrating into the vessel wall; and

providing a fluid medicament and releasing said fluid medicament through said dispensers into the vessel wall for a substantially circumferential dispersion of said fluid medicament into said vessel wall.

- (Original) The method of claim 1 wherein said fluid medicament inhibits the proliferation of smooth tissue growth in the vessel.
- (Original) The method of claim 1 wherein said fluid medicament comprises a radioactive isotope.
- (Original) The method of claim 1 wherein said fluid medicament stimulates the production of collateral vessels.
- 5. (Canceled)
- (Canceled)
- (Original) The method of claim 1 wherein said fluid medicament comprises a binder which binds to at least a portion of the vessel wall.

Serial No. 10/761.387

(Canceled)

 (Original) The method of claim 1 wherein said fluid medicament comprises a gene for gene therapy.

10. (Previously presented) A method for releasing fluid medicaments into a vessel wall of a patient at a treatment site, the method comprising the steps of:

providing an expanding member defining an axis and having a plurality of dispensers mounted thereon for movement therewith, said dispensers consisting only of dispensers positioned in a single plane oriented substantially perpendicular to said axis;

advancing said expanding member through the vessel to the site;

moving said expanding member between a first configuration wherein said dispensers are positioned substantially adjacent said axis of said expanding member, and a second configuration wherein said dispensers are radially extended from said axis for penetrating into the vessel wall; and

providing a fluid medicament and releasing said fluid medicament through said dispensers into the vessel wall for dispersion of said fluid medicament into said vessel.

11. (Canceled)

- (Previously presented) The method of claim 10 wherein said fluid medicament inhibits the proliferation of smooth tissue growth in the vessel.
- (Previously presented) The method of claim 10 wherein said fluid medicament comprises a radioactive isotope.
- 14. (Previously presented) The method of claim 10 wherein said fluid medicament stimulates the production of collateral vessels.
- 15. (Canceled)
- (Canceled)

17. (Previously presented) The method of claim 10 wherein said fluid medicament comprises a binder which binds to at least a portion of the vessel wall.

- 18. (Canceled)
- (Previously presented) The method of claim 10 wherein said fluid medicament comprises a gene for gene therapy.
- 20-28. (Canceled)
